## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers filed under 35 U.S.C. 119 (a)-(d) based on an application filed in Italy on October 15, 1998. Applicant has not complied with the requirements of 37 CFR 1.63(c), since the oath, declaration or application data sheet does not acknowledge the filing of any foreign application. A new oath, declaration or application data sheet is required in the body of which the present application should be identified by application number and filing date.

### ***Specification***

2. The disclosure is objected to because of the following informalities: the specification should not refer to any claims, e.g., "according to claim 1, ... in the dependent claims", found in page 2, first paragraph.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3652

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. The claim is generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. Further, there are insufficient antecedent basis for limitations in the claims, e.g., "the outlet", in line 9.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 1 (as best understood) is rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art Figure 1.

The admitted prior art, Figure 1, discloses a vehicle lift comprising two runways, a volumetric operating system having a pair of main cylinders and a pair of secondary cylinders. The admitted prior art discloses all the claimed limitations except for having one of the main cylinder and one of the secondary cylinders connected to each of the runways. It would have

Art Unit: 3652

been an obvious to one having ordinary skill in the art at the time the invention was made to place one of the main cylinders and one of the secondary cylinders to support each of the runways, since it has been held that rearranging parts of the invention involves only routine skill in the art.

*Conclusion*

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the cited references separately discloses a hydraulic system for raising and lowering platform.
